

RAPID7 DEPLOYMENT TRANSITION WITH TENABLE PROFESSIONAL SERVICES

KEY CHALLENGES

Moving from one solution to another can seem like a daunting task. A full understanding of capabilities is required, coupled with the proper deployment to ensure the solution processes and capabilities are aligned with your organization's security objectives. Tenable Professional Services has a proven approach for successfully moving small, midsize, and large organizations from Rapid7 to Tenable.

TRANSITION SERVICES OVERVIEW

Tenable Professional Services can tailor a deployment transition engagement specific to your needs and objectives. We start by understanding your business objectives and desired outcomes, where you are today and where you need to be. Then we apply our proven methodology to get you there. We offer a full cycle of services that include design, training, implementation, integration and support – all with your success in mind.

HOW WE'LL WORK WITH YOU

You'll work with a Tenable Certified Security Consultant from Tenable Professional Services or one of our qualified partners to move from your current solution to a Tenable solution.

The following steps have been defined to address implementation points ensuring a successful transition:

- **Assessment, Plan, and Design** – with a Cyber Exposure Advisory Workshop, our industry experts ensure your vulnerability management program is operating at full strength.
- **Product Training** – hands-on instructor-led classes to ensure you understand all the product capabilities.
- **Process Best Practices** – ensure your team is using the Tenable solution to achieve maximum value.
- **Implementation & Operation** – configure the solution to your specific business needs and ensure all elements such as Asset Groups, Scan Policies, and automated reports are translated to our solution.
- **Integration & Automation** – for new and existing technologies.
- **Ongoing Support** – a variety of support options to maximize realized value.

KEY BENEFITS

Aligns your Tenable solution with your business requirements

Implements your Tenable solution according to Tenable and industry best practices

Accelerates the successful transition of your existing Rapid7 solution to a Tenable solution

Transfers knowledge of Tenable best practices for enterprise deployment and system-wide scanning

Delivers the documentation and knowledge you need to maintain your deployment in its most effective state

Enables integration with new and existing technology, ensuring you make the most of your investments and keep pace with emerging threats and technology

KEY RAPID7 SOLUTION ELEMENTS TO TRANSITION

- Sites and asset groups
- Scan definitions and policies
- Common reports and dashboards
