

## **TENABLE FOR SERVICENOW® ASSETS** ENSURING AN ACCURATE VIEW OF EXPOSURE ACROSS ALL ASSETS

## **Business Challenge**

Security and IT teams are constantly tasked with needing real-time visibility and up to date tracking of their organization's dynamic set of assets. With the ability to swiftly spin up elastic cloud environments or the emergence of converged IT/OT environments, having complete visibility is more important than ever. Those assets tracked within their Configuration Management Database are often inaccurate and misrepresented, which can lead to increased risk for the organization.

### Solution

The Service Graph Connector for Tenable® for Assets integration with ServiceNow's CMDB offers best-in-class asset management by combining the industry-leading ServiceNow CMDB with the asset discovery capabilities of Tenable. By ensuring that both platforms share information on a variety of known assets, this integrated solution provides IT and security teams a cohesive platform for continuous visibility and prioritization across the enterprise.

## Value

The Service Graph Connector for Tenable for Assets for provides the ability to:

- Leverage Tenable's industry leading asset discovery to populate and enrich your CMDB
- Use ServiceNow IRE to match Tenable Assets to your existing Cl's
- Utilize ServiceNow IRE to create new Cl's in your CMDB
- Close the knowledge gap between IT and Security teams, working from the same repository of assets
- Include Unique fields that are tracked across records
- Ensure IT and Security have the same visibility of assets
