tenable®

THE PROBLEM WE SOLVE

Digital transformation has led to an explosion of new technologies, connected devices and compute platforms. From IT to Cloud to IoT to OT, this complex digital computing landscape is the modern cyber attack surface. Organizations are lacking visibility and insight into this modern attack surface, creating a gap in an organization's ability to understand its Cyber Exposure at any given time. The tools and processes of yesterday are being used to solve today's problems – built and designed for the old era of IT when the cyber attack surface was a static laptop, desktop or on-premises server. In the new digital era, a new approach is needed.

We are the first and only provider of Cyber Exposure solutions. We work with more than 24,000 companies and government organizations around the world to help them manage and measure cybersecurity risk in the digital era. We are building on our deep technology expertise as a pioneer in the vulnerability assessment and management market, providing broad visibility across the modern attack surface and deep insights to help security teams, executives and boards of directors prioritize and measure Cyber Exposure. We are increasingly seeing organizations of all sizes factor in Cyber Exposure as a key risk metric to guide strategic decision making, just as they leverage other organizational systems of record including CRM for forecasting risk and ERP for supply chain risk.

OUR TECHNOLOGY

tenable.io™

Tenable.io®, our Cyber Exposure platform, provides broad visibility and deep analytics to secure the entire modern attack surface. Tenable.io automatically discovers and assesses the environment—from IT to Cloud to IoT and OT—for vulnerabilities, misconfigurations and other cybersecurity issues. Our platform helps security teams prioritize remediation based on risk and provides executives and boards of directors with an objective way to measure an organization's Cyber Exposure.

SecurityCenter SC™

SecurityCenter® helps organizations manage vulnerabilities across traditional IT assets—including endpoints and on-premises infrastructure—and provides automated assessment against security frameworks and compliance regulations. SecurityCenter includes a variety of pre-built, highly customizable dashboards and reports to enable organizations to track the effectiveness of their security and compliance programs.

Nessus N™

Nessus® is one of the most widely deployed vulnerability assessment solutions. Nessus Professional is a cost-effective solution for security consultants and practitioners to identify IT vulnerabilities, configuration issues and malware with accuracy, ease and speed. Nessus Home is a free version which provides vulnerability and configuration assessment across a limited number of IT assets.

QUICK FACTS

FOUNDED	HEADQUARTERS
2002	Columbia, MD, U.S. International headquarters in Dublin, Ireland Presence in over 20 countries

MARKET REACH

- More than 24,000 customers
- More than 50 percent of the Fortune 500
- More than 25 percent of the Global 2000
