

## Tenable.io: Asset & Vulnerability Management Two-Day Course

**Empower your security team with virtual or on-site instructor-led courses from Tenable Customer Education to help ensure your security staff is trained to manage Tenable.io and maximize the value of your investment.**

### Overview

Tenable Customer Education partners with your organization to enable success in deploying, implementing and managing your solution. Tenable experts provide foundational training to ensure your team has the best practice knowledge to manage the solution. Tenable also delivers in-depth product training to your security practitioners, ensuring they understand how to optimize your solution to maximize return on investment and achieve your security goals. Our security experts offer flexible delivery methods, including virtual or on-site training, to meet your needs amid typical resource constraints. Tenable also offers a Certificate of Proficiency examination that validates your security team has the comprehensive skills, experience, product mastery and credentials necessary to successfully maximize the efficacy of your deployment and make the most of your investment.

### Does Your Security Staff Need Instructor-Led Courses?

If you've purchased Tenable.io™ and want to ensure your security staff is trained to most effectively deploy and manage your solution, then Tenable's instructor-led courses are right for you. As part of these courses, Tenable provides a real-world lab environment to give your team hands-on experience with the product under the guidance of a Tenable expert.

### Instructor-Led Courses

Tenable's instructor-led courses are designed to prepare your security staff to reach your vulnerability management and continuous monitoring goals. Tenable's hands-on, instructor-led courses are offered in a virtual setting, or are available on-site for up to 15 people from your organization. These courses are focused around an enterprise suite of products. The information below provides more detail on the course offering.

### Key Benefits

- Offers a hands-on lab environment to give your team real-world experience
- Provides security staff with the foundation to successfully manage your Tenable solution according to best practices
- Ensures your security practitioners understand both the basic and advanced features of your solutions to maximize the usage and return on investment
- Offers flexible delivery methods to achieve goals within typical resource constraints

The following table outlines the specific steps and tasks Tenable Professional Services will take as part of the Custom Integration Services.

Course	Tenable.io: Asset and Vulnerability Management Two-Day Course
Course Description	In this two-day, hands-on, instructor-led course, students will learn the foundational building blocks of Tenable.io. Students will take a deep dive into the concepts of vulnerability assessment, reporting and management, including demonstrations that show how to share data, run scans, contextualize and analyze data, and quickly share reports with key stakeholders. Students will also learn how to identify and track assets, including infrastructure devices and mobile assets.
What's Covered	<p>This course covers the following topics:</p> <ul style="list-style-type: none"><li>• Introduction to Tenable.io</li><li>• Information Gathering</li><li>• Asset Management Overview</li><li>• Asset Discovery Process</li><li>• Asset Categorization</li><li>• Asset Reporting</li><li>• Vulnerability Management Overview</li><li>• Vulnerability Assessment</li><li>• Vulnerability Reporting</li><li>• Sensor Deployment</li></ul>
Audience	This course is for security professionals responsible for the operational use of Tenable.io for vulnerability data acquisition, analysis and dissemination.
Prerequisites	Students should possess a basic understanding of TCP/IP networking, operating systems security and common client/server applications. Familiarity with vulnerability management vocabulary and concepts will be helpful, but is not required.

## Count on Tenable Customer Education

Deploying a solution is only half of what's needed to be successful. Your staff must be able to properly leverage its value to ensure your investment is delivering a return. With Tenable Customer Education, we get your staff up and running quickly, reducing costs and enhancing productivity by eliminating learning cycles. We go beyond the fundamentals of product functionality and include industry best practices as well as insight gained from working with thousands of customers around the globe to enable your team to provide valuable insights to improve your security posture.
