Tenable and Cortex XSOAR
Automated Vulnerability Management and Response

Business Challenge
Organizations struggle with focus and upkeep on security tools within their security environment. These gaps put them at greater risk resulting in the growth of their threat landscape. Without integrating Tenable’s vulnerability data into Cortex XSOAR, organizations are left without a way to utilize automated workflows and maximize resources for accelerated incident response.

Solution
The Cortex XSOAR integration with Tenable combines Tenable's Cyber Exposure insights with the Cortex SOAR engine for complete visibility into an organization’s security infrastructure and attack surface. Security and IT teams are provided with management insights, pre-configured workflows and real-time dashboards to automate time-intensive, manual processes for streamlined incident response. Organizations can utilize the integration to represent and correlate vulnerabilities, assets and scan data from Tenable combined with Cortex's XSOAR engine for improved incident response.

Value
The Cortex integration for Tenable provides the ability to:

• Provide pre-defined parameters for running Vulnerability Management scans without requiring knowledge about Vulnerability Management configuration & internal network infrastructure
• Define approval processes for running adhoc infrastructure vulnerability scans
• Allow for the creation of automated workflows across security tools
• Centralize your vulnerability insights by viewing a single dashboard

Technology Components
• Tenable.io or Tenable.sc 5.13+
• Cortex XSOAR

Key Benefits
• Improve incident response time
• Enrich incident response with vulnerability context
• Improve processes with configured workflows
• Automate your teams’ manual tasks
• Connect Tenable to disparate security tools
• Enforce SLA on response actions
ABOUT TENABLE
Tenable®, Inc. is the Cyber Exposure company. Over 30,000 organizations around the globe rely on Tenable to understand and reduce cyber risk. As the creator of Nessus®, Tenable extended its expertise in vulnerabilities to deliver the world’s first platform to see and secure any digital asset on any computing platform. Tenable customers include more than 50 percent of the Fortune 500, more than 30 percent of the Global 2000 and large government agencies. Learn more at www.tenable.com

ABOUT PALO ALTO NETWORKS
Palo Alto Networks is the next-generation security company, leading a new era in cybersecurity by safely enabling applications and preventing cyber breaches for thousands of organizations worldwide. Built with an innovative approach and highly differentiated cyber threat prevention capabilities, our game-changing security platform delivers security far superior to legacy or point products, safely enables daily business operations, and protects an organization’s most valuable assets.

FEATURES
With this integration, you can:

- Sync vulnerability information, including state from Tenable platforms
- Prioritize remediation based on the likelihood of a vulnerability being exploited
- Scan a host during an investigation
- Request a remediation scan during an investigation
- Get the latest vulnerability summary for a host during an investigation
- View a single dashboard with configured vulnerability feeds
