Business Challenge

Security and IT teams must work together to keep the organization secure from an ever-growing list of cyber threats and vulnerabilities. Disparate toolsets, misaligned workflows and competing priorities can work against security and IT teams from finding and fixing vulnerabilities. The result puts the most critical business systems in danger of exploitation.

Solution

The Tenable.io integration for SaltStack Protect combines comprehensive vulnerability insight from Tenable with powerful SaltStack automation for complete detection and remediation of dangerous vulnerabilities and misconfigurations. By integrating Tenable and SaltStack, security and IT teams can bridge the gap between their workflows through a common solution that ingests scans and remediates critical vulnerabilities fast and at large scale.

Value

The SaltStack integration for Tenable.io provides the ability to:

- Reduce cyber risk by giving your teams the tools they need to act decisively and quickly
- Increase team productivity, with less time spent on manual, repetitive tasks
- Remediate vulnerabilities faster to decrease risk of exploitation
- Reduce delays caused by manual handoffs between security and IT teams.

Technology Components

- Tenable.io
- SaltStack Enterprise 6.3
- SaltStack Protect add-on

Key Benefit

- **Eliminate manual data handovers** in the vulnerability management process
- **Fix vulnerabilities fast, at any scale**
- **Report fixes back to Tenable.io for closed-loop reporting**
- **Use additional system data** from SaltStack to better understand your environment
ABOUT TENABLE
Tenable®, Inc. is the Cyber Exposure company. Over 30,000 organizations around the globe rely on Tenable to understand and reduce cyber risk. As the creator of Nessus®, Tenable extended its expertise in vulnerabilities to deliver the world’s first platform to see and secure any digital asset on any computing platform. Tenable customers include more than 50 percent of the Fortune 500, more than 30 percent of the Global 2000 and large government agencies. Learn more at www.tenable.com

ABOUT SALTSTACK
SaltStack® intelligent IT automation software is used to help the largest businesses in the world manage and secure their digital infrastructure. Known for its powerful event-driven infrastructure automation engine, SaltStack is designed to control and secure critical infrastructure while providing efficient, collaborative solutions for ITOps, SecOps, NetOps and DevOps teams. SaltStack maintains the award-winning Salt open source project which continues to be one of the largest, most-active open source projects in the world. Learn more at www.saltstack.com

Features
With this integration, you can:

• Automate API handoff of discovered vulnerabilities from Tenable to SaltStack
• Vulnerability analyzer in SaltStack lets the user know which vulnerabilities from Tenable can be automatically remediated
• SaltStack Protect exports asset data back to Tenable to ensure up-to-date asset information

The diagram above shows Tenable vulnerability data within into SaltStack to help Security and IT teams achieve detection and remediation of critical vulnerabilities.
