

Tenable for ServiceNow® Assets

Ensuring accurate view of Cyber Exposure across all assets

Business Challenge

Security and IT teams are constantly tasked with needing real-time visibility and up to date tracking of their organizations dynamic set of assets. Those assets tracked within their Configuration Management Database are often inaccurate and misrepresented, which leads to increased Cyber Exposure

Solution

The Tenable® for Assets integration with ServiceNow's CMDB offers best-in-class asset management by combining the industry-leading ServiceNow CMDB with the asset discovery capabilities of Tenable. By ensuring that both platforms share information on known assets, this integrated solution provides IT and security teams a cohesive platform for continuous visibility and prioritization across the enterprise.

Value

The Tenable suite of ServiceNow apps provide:

- Enable Tenable to scan all assets within ServiceNow
- Ensure vulnerability tracking in ServiceNow from Tenable asset discovery
- Leverage Tenable's industry leading asset discovery to populate and enrich your CMDB
- Configure how Tenable assets are matched to your existing CI's
- Configure when Tenable assets create new CI's in your SNOW CMDB
- A solution to close the knowledge gap between IT and Security teams, working from the same repository of assets
- Unique fields are included and tracked across records
- Ensure IT and Security have the same visibility of assets

Technology Components

- Tenable.io/Tenable.sc 5.7
- Tenable Connector
- Tenable for Assets
- ServiceNow New York or Orlando
- ServiceNow MID server (optional)

Key Benefits

- **Eliminates Silos** of asset knowledge
- **Enhances** your existing vulnerability scan coverage
- **Improve Visibility and Communication** between Security and IT Teams
- **Customizable** CI flow between ServiceNow and Tenable

ABOUT TENABLE

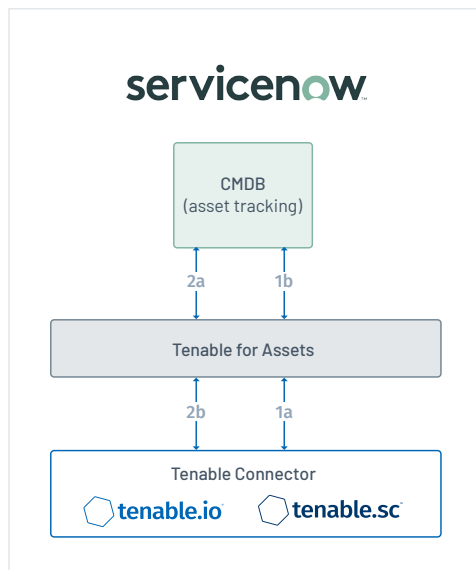

Tenable®, Inc. is the Cyber Exposure company. Over 27,000 organizations around the globe rely on Tenable to understand and reduce cyber risk. As the creator of Nessus®, Tenable extended its expertise in vulnerabilities to deliver the world's first platform to see and secure any digital asset on any computing platform. Tenable customers include more than 50 percent of the Fortune 500, more than 25 percent of the Global 2000 and large government agencies. Learn more at www.tenable.com.

ABOUT SERVICENOW

ServiceNow was started in 2004 with the belief that getting simple stuff done at work can be easy, and getting complex multi-step tasks completed can be painless. From the beginning, ServiceNow envisioned a world where anyone could create powerful workflows to get enterprise work done. Today, ServiceNow's cloud-based platform simplifies the way we work through a structured security response engine. ServiceNow Security Operations automates, predicts, digitizes, and optimizes security and vulnerability response to resolve threats quickly based on business impact. Reduce manual processes and increase efficiency across security and IT teams. ServiceNow is how work gets done. Learn more at servicenow.com

Features

- Syncing CI's from ServiceNow to Tenable
- Syncing assets from Tenable to ServiceNow CMDB
- Create custom rules that automatically create ServiceNow CIs from Tenable assets
- Create custom rules to better match tenable assets to existing CI's
- Review unmatched Tenable assets and create new CI's or merge them to existing CIs.
- Configure which ServiceNow CIs are sent to Tenable as assets
- All tenable unique asset attributes are available on servicenow CI's
- Provides ability for customization while maintaining upgradability

How It Works

- 1.a** Get assets to Sync from Tenable into ServiceNow
- 1.b** Match each asset from Tenable to an existing ServiceNow CI or create it if a match isn't found
- 2.a** Find all CI's matching your criteria
- 2.b** Push all found CI's from ServiceNow to Tenable
